

Dive Deep into Global Affairs

August 18, 2024

Dear Educator,

Whether you are welcoming your students into the classroom or are still in preparation mode, our goal is to ensure that you have access to all of the resources you need for a successful fall.

You may know that CFR Education resources are informed by the experts at the Council on Foreign Relations, but did you know they also include content from across the Council?

This newsletter will outline how to seamlessly pair CFR's up-to-date context and in-depth analysis with our introductory resources to dive deeper into global affairs.

Happy learning,

CFR Education

Learning Journeys

Made specifically for students to work through in order, learning journeys are curated sets of resources designed to give a deeper understanding of a topic.

Learning journeys not only gather resources, they also provide guidance on what to focus on and highlight threads that connect each resource to the next.

Will China Invade Taiwan?

Students will [survey Taiwan's history and explore its relationship with the United States and China](#) with readings from CFR Education, CFR, and *Foreign Affairs*. Then, they can simulate participating in U.S. decision-making through a mini simulation.

How Is AI Changing the World?

This learning journey asks students to [consider the opportunities and challenges of AI](#) using readings from CFR Education and CFR. Then, they can decide how best to regulate AI by playing the role of a National Security Council (NSC) member.

Integrated Readings

CFR Education was created to be a resource on the fundamentals of global affairs and foreign policy, but we also acknowledge that some students (hello, future diplomats!) might be eager to go a step further. That is why you can now find CFR resources integrated into some of our readings.

- The educator favorite, [Six Essential International Organizations You Need to Know](#), includes a deeper dive from CFR that asks, [What Does the G20 Do?](#)

- The very timely reading, [What Is International Law?](#), suggests zeroing in on [The Role of the ICC](#).
- Once your students have read [How Do Governments Combat Climate Change?](#) they can learn about the outcomes of some of the options by exploring [Global Climate Agreements: Successes and Failures](#).

Keep an Eye Out

We consider CFR Education to be a gateway to the wider work of the Council. That is why throughout the year, the CFR Education Newsletter will also include:

- Free access to hand-picked *Foreign Affairs* articles like [this piece on national security](#);
- podcast episodes, such as this [one on AI and elections](#), which connect to issues students care about; and
- recorded CFR member events with the world's greatest policy minds.

Do you know a fellow educator who would find this newsletter helpful as they plan for back to school? [Share it with a friend!](#)
